### **Goal**

I'm looking for a job where I can become better at what I do and extend my expertise.

### **PERSONAL QUALITIES**

I'm very interested in learning new things, social along co-workers and love to be a part of a team.

### **Employments**

**OneCoder, Stockholm**

**June 2015 - Present**

**SysAdmin / DevOps / CEO**

As of June this year, I've started my own business on the side called OneCoder.

Here we are a group of people doing development and sysadmin work on the side of work.  
I'm the founder and CEO of the company.

**Ericsson, Kista, Stockholm**

**Februari 2015 - Present**

**SysAdmin / DevOps**

At Ericsson I'm working with clusters along with stand-alone server.  
We run big Red Hat environments with FOSS from apache foundation.  
Technologies that we use are the following:  
Zookeeper, Apache, rhel7, kafka, storm, citrix, mongodb, Activemq, collectD, supervisord etc.

Bash and Perl scripting occurs along with this work.

**LeadDesk, Östermalm, Stockholm**

**August 2014 - Februari 2015**

**Systems Technician**

Employed at Leaddesk where I've worked with support and mainly worked with the following technical aspects:

PBX, Debian/Linux servers, Voip, Zendesk and Bash scripting.

**Freelance - Betsson, Stockholm**

**November 2013 - July 2014**

**Bookmaker**

Lived of betting at high stakes.  
People hired me to make money for them, via betting.

**R2Meton, Kista, Stockholm**

**April 2013 - September 2013**

**DevOps**

Employed at AcademicWork as an DevOps / technician at R2Meton where I worked with their

Red Hat servers.

I worked with the following technical aspects:

ServiceMixes, nginx, Red Hat servers, Puppet, tomcat, Nagios and Bash scripting.

### **Eskilstuna cityhall, Eskilstuna**

**July 2012 - March 2013**

#### **Sysadmin**

Worked as a System Administrator in Eskilstuna cityhall.

I managed their intranet and their external website.

SharePoint and EPiServer was my work environments.

### **Q-free, Solna, Stockholm**

**February 2012 - April 2012**

#### **NOC technician.**

Worked as an NOC Technician who administrated Stockholms tollgates and some of Portugals tollgates.

I only worked with Linux servers and managed the operations that occurred.

### **Hotellportalen, Stockholm**

**August 2011 - December 2011**

#### **Web Developer / Front end developer**

Php, html, css, javascript and mysql was the language I used here.

I worked here while I was searching for a job within my range of expertise.

### **Transcom AB, Eskilstuna / Kungsor**

**May 2011 - August 2011**

#### **Support-technician**

Phone support for Tele2

I worked as a broadband support-technician.

## **EDUCATION**

NTI highschool, Eskilstuna  
August 2008 - June 2011  
Computer school where I studied networks.

## **INDEPENDENT COURSES**

**Stanford University, Distance**

**February 2013 - August 2013**

Read the following courses:

- Linux Administration
- Basic web server technologies (Apache, php, mysql, etc.)
- Fundamental Algorithms (technology behind the servers and clients talking to each other, etc.)

## **IDEALISTIC OPERATIONS**

**Team zHan, Online**

**June 2007 -**

Operating a small community called Team zHan.

This is a medium group of people that play games and socialize with each other.

I manage the servers and keep them updated.

## **LANGUAGE SKILLS**
